

# **SOUNDCOMMANDER®** **SC1300EX COMMAND PACK** **PA SYSTEM**

**High-Power, Portable, Mass Notification, Public Address/Loudspeaker Systems**

The **SOUNDCOMMANDER® (SC) 1300EX System** is a portable, high-output, public address (PA)/loudspeaker system consisting of a ruggedized, stand alone lightweight Command Pack PA module and a full range of expansion components. Produced to meet demanding requirements of military, fire, law enforcement, and disaster support, it projects clear, undistorted audio to a range of 1000 meters (3300 ft).

**SOUNDCOMMANDER®'s** high power, long range and exceptional clarity, make it the system of choice for psychological operations, emergency evacuation, rescue operations, command and control of military and disaster sites, point tactical locations and other mass notification, or directed audio requirements. They also excel in force protection, civil disturbances, hostage negotiation, on training ranges and for administrative activities.

With its mass communication capabilities this SoundCommander system would have helped relieve the suffering and anxiety of so many victims after Hurricane Katrina. Following the 2004 Asian Tsunami, SOUNDCOMMANDER® Command Pack systems were used extensively to support rescue and aid operations throughout the region.

**SC1300 COMMAND PACK** the basic stand-alone segment of the system, includes a hands-free tactical headset microphone, internal loudspeaker, three powerful sirens, rechargeable battery and charger, inputs for various accessories and outputs for up to three loudspeakers. It is protected by a rugged aluminum framework and housed in an integral 1000-denier Cordura nylon padded soft case with built in pockets for storing accessories. The unit can be powered by its battery, external 12 or 24VDC source, or via 110-220VAC external power. The Command Pack, with included accessories, weighs less than 22 lbs. (9 Kg). It can be carried by its carry handle, shoulder strap, or attached backpack straps for field operations over rough terrain.

**THE SC1300EX Expansion Module** completes the system by adding, the SC wireless remote VHF transmitter with 200 meter range, two additional external speakers, each with 50' (16m) cables, for longer range, or for wider area coverage, Two adjustable tripod equipment stands with articulating leg and padded cases, a 2<sup>nd</sup> microphone (stage or push-to-talk) an external 15 Amp 110-220VAC -13.4VDC power supply and a wheeled hard transport/storage case with pull handle.

**SOUNDCOMMANDER® 1000 and I300** systems have proven themselves in operations in Somalia, Bosnia, Iraq, Afghanistan, East Timor and elsewhere. They were used extensively for Tsunami support and operations. They are presently employed around the world with military forces, police and fire departments.
